Neuroscience

Benjamin Stucky

# dualism

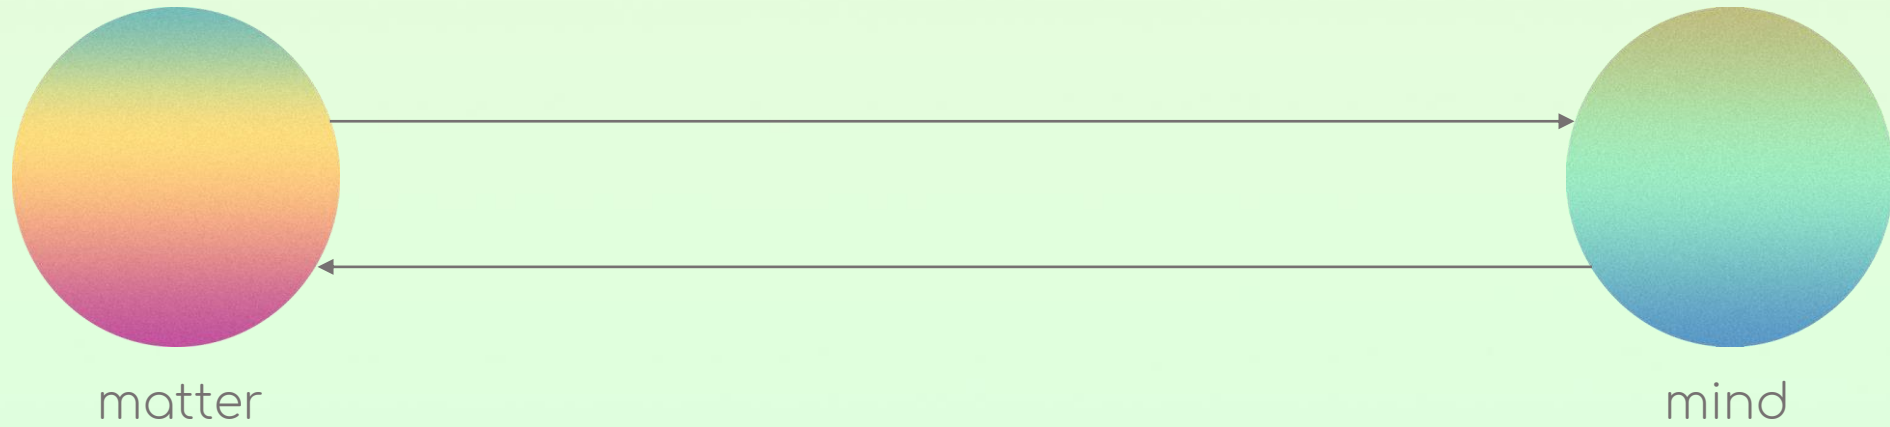

matter

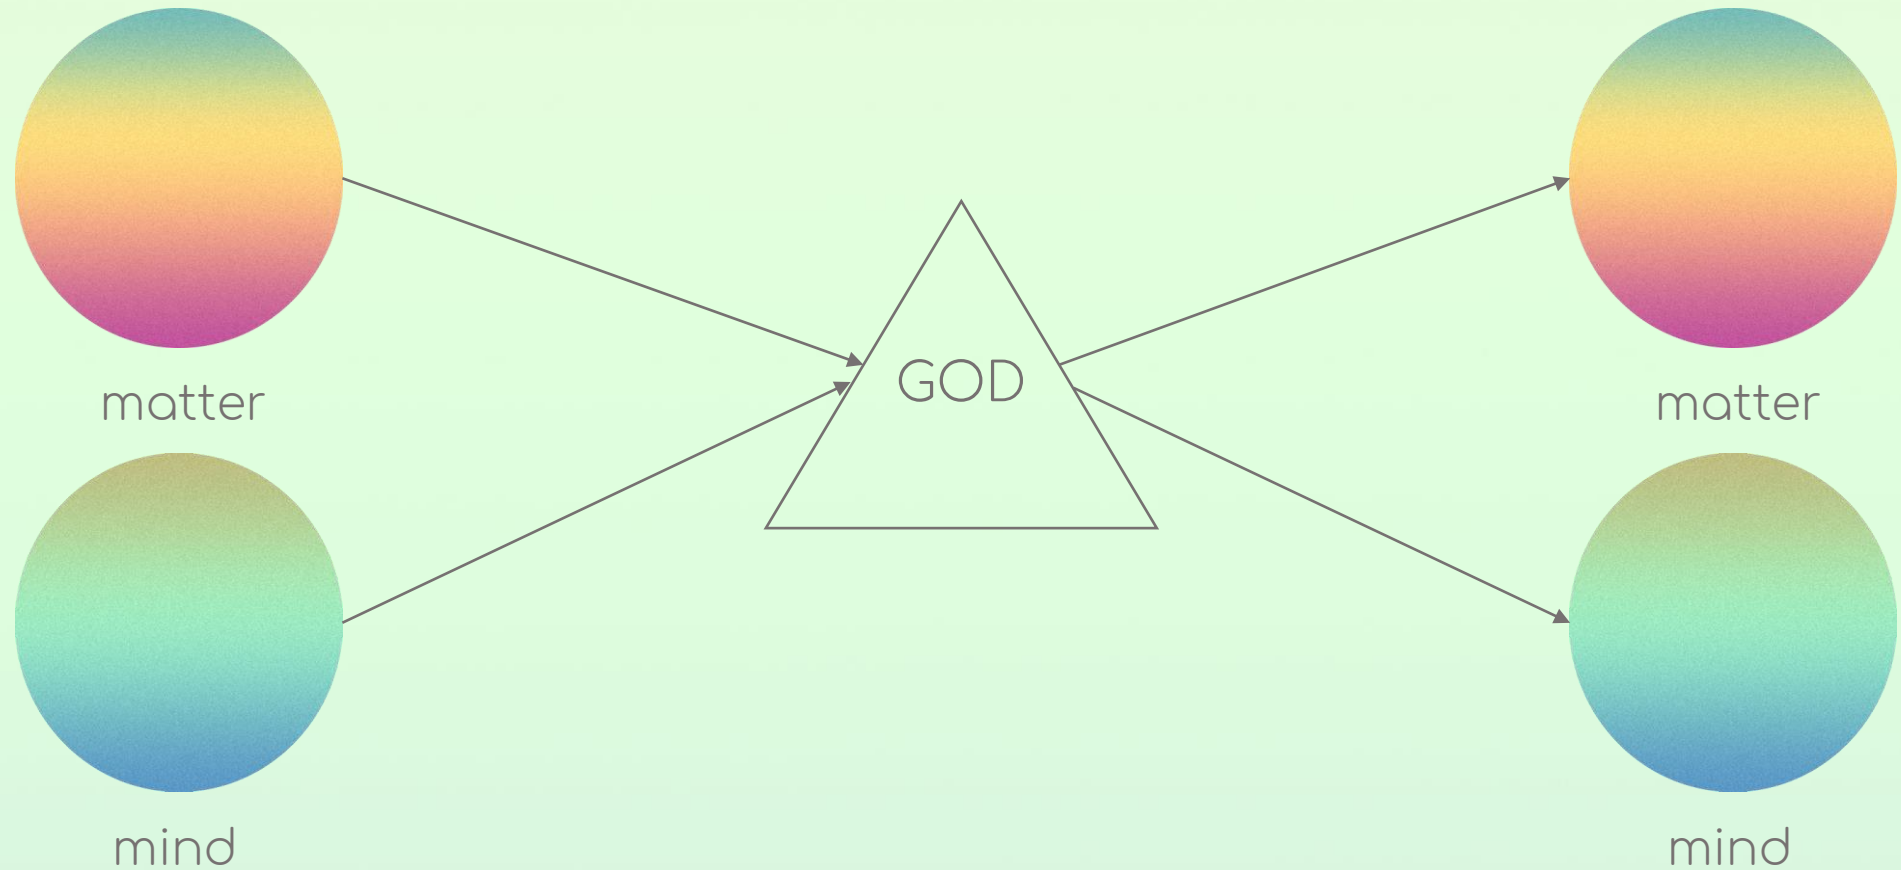

mind

substance dualism  
interactionism

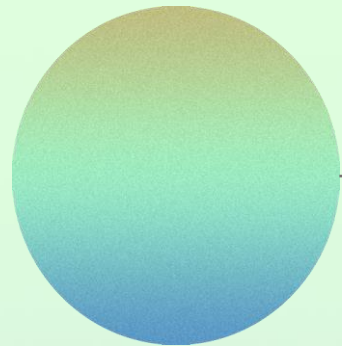

# substance dualism occasionalism

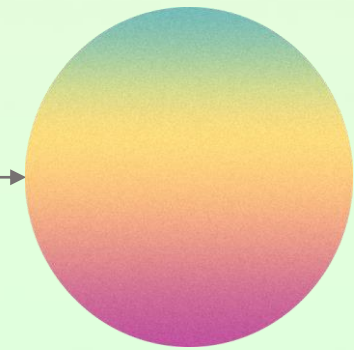

substance dualism  
parallelism

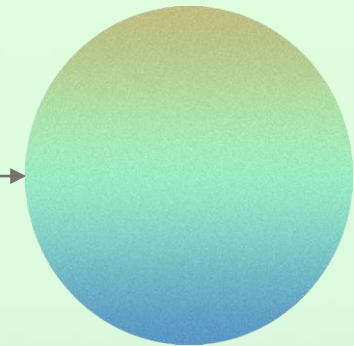

matter

mind

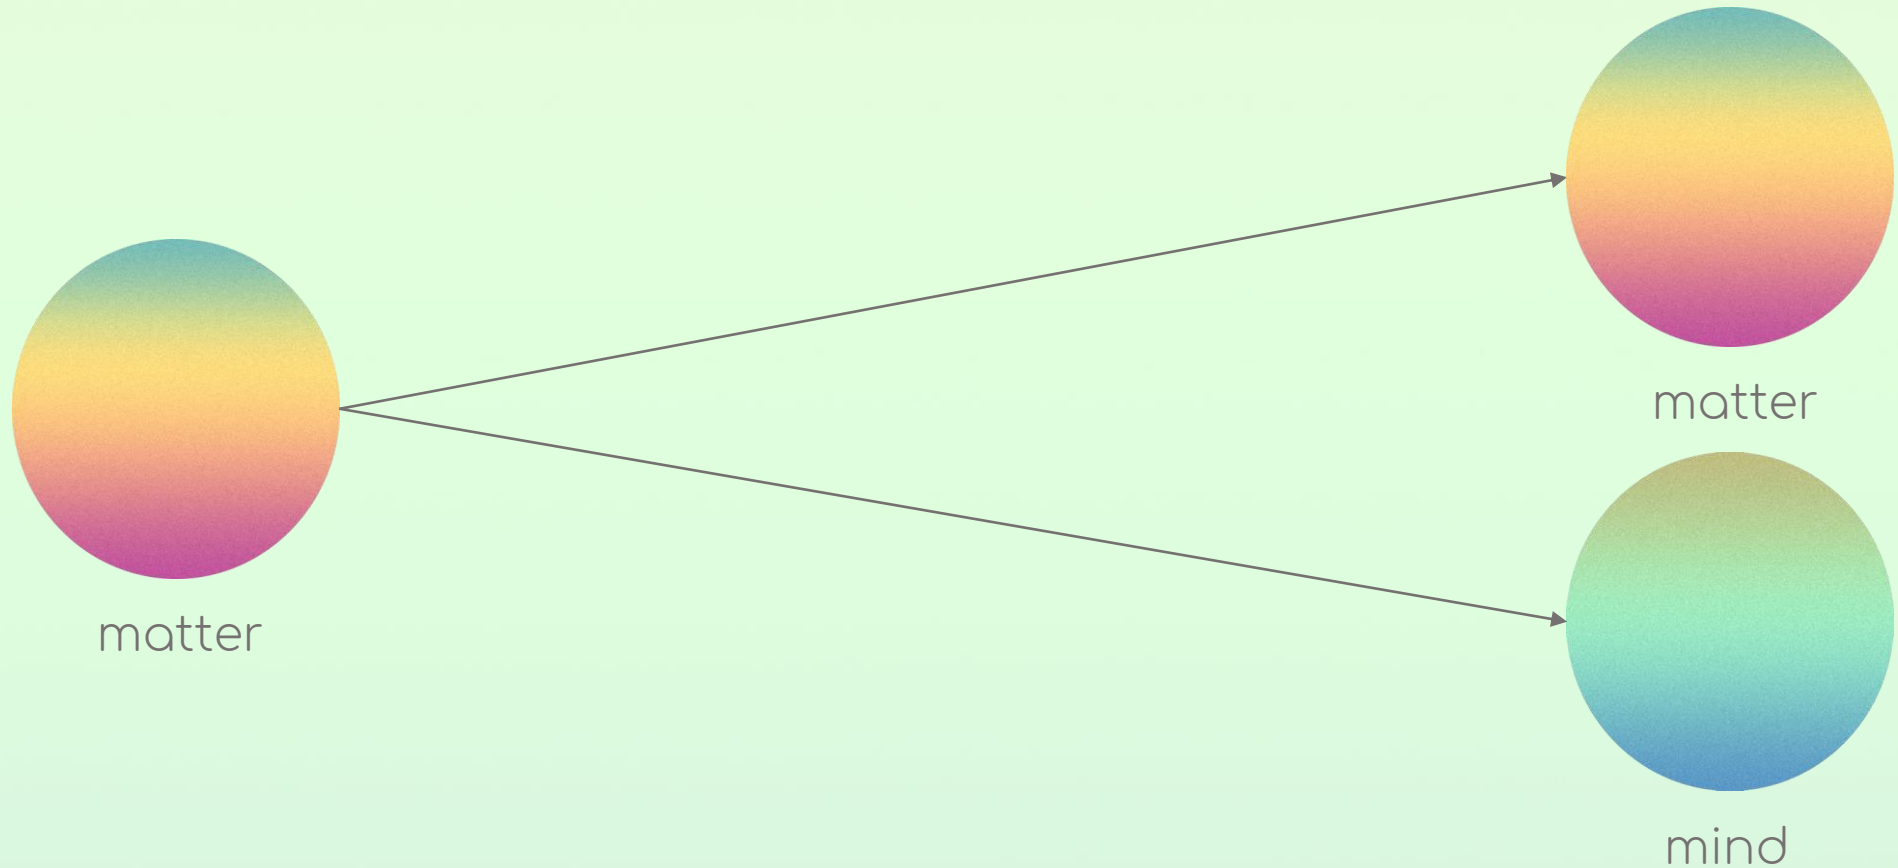

matter

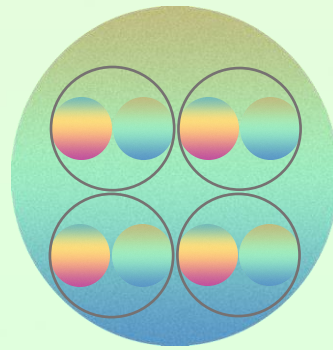

mind

harmony

property dualism  
epiphenomenalism

property dualism  
panpsychism

all matter has a  
first person  
perspective

physicalism

matter

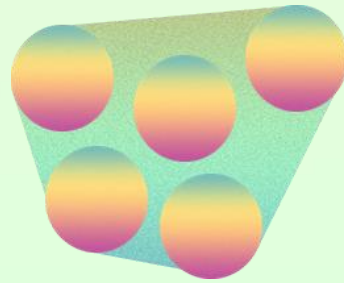

# physicalism behaviorism

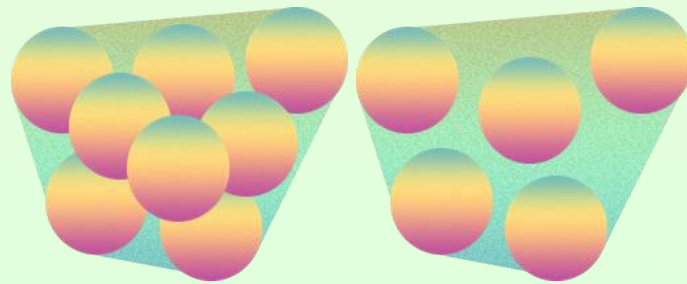

describing  
observable  
behaviour  
Is enough

# physicalism type identity

type of matter  
configuration  
=  
type of mental  
state

# physicalism token identity

token matter  
event  
=  
token mental  
event

# physicalism functionalism

characterizing  
mental states in  
terms of their  
function

physicalism  
eliminative materialism

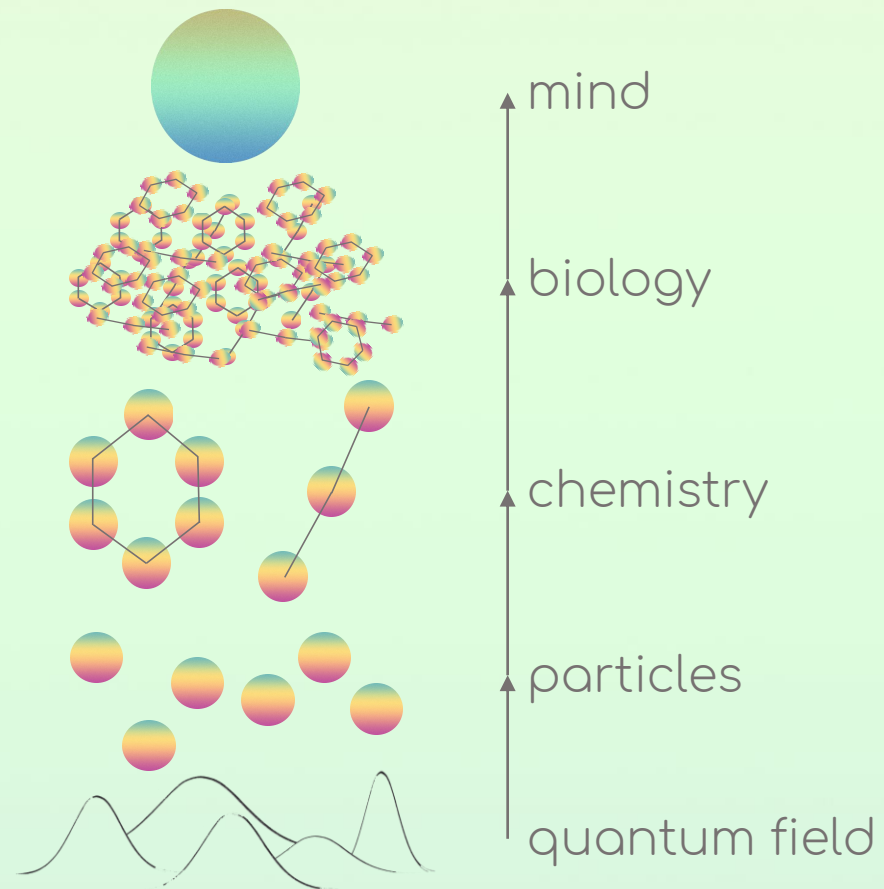

mind is an illusion

# non-reductive physicalism

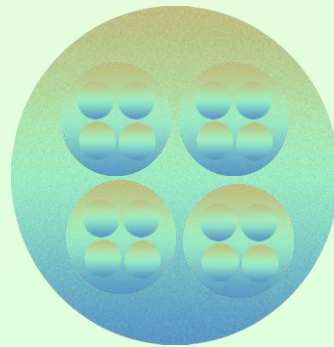

all is matter  
but mind cannot  
be reductively  
explained

# non-reductive physicalism emergentism

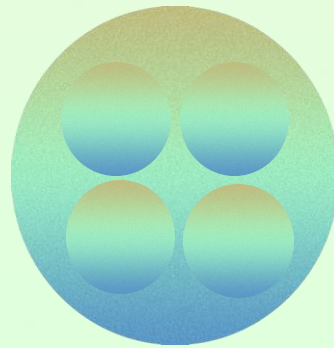

idealism  
micro

microscopic  
mental entities  
form bigger  
mental organism  
possibly up to the  
universe

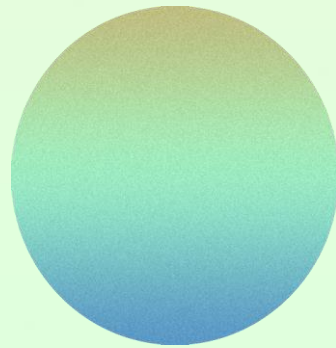

idealism  
macro

macroscopic  
mental organism

idealism  
universal

only one cosmic  
mind

# neutral monism

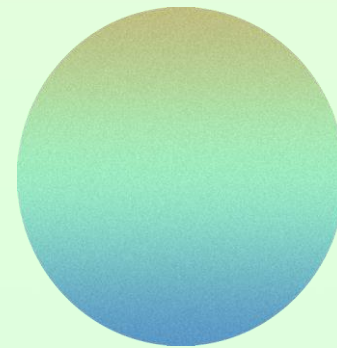

one substance  
neither matter  
nor mind

# new mysterianism

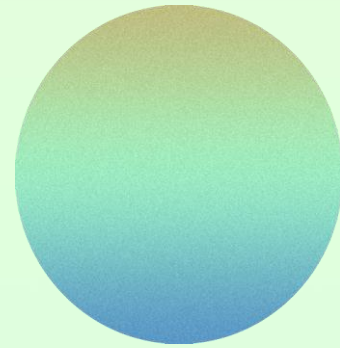

subjective vs  
objective gap is  
unsolvable

what are your views

?

# my view

if all you have is a hammer,  
everything looks like a nail  
- Abraham Maslow

consciousness is primary

descriptions are secondary  
never complete  
but usefull nontheless
